<https://www.linkedin.com/in/ergy-david-lundy> | <https://ruminas99.github.io/portofolio/>

A detail-oriented and analytical Computer Science recent graduate with a strong interest in data analytics. Certified as a Data Analyst by BNSP, with hands-on experience in Python, data processing, and Machine Learning. Have technical skills in Front-End Development using HTML, CSS, Tailwind, and React, and supported by Back-End understanding (PHP & Laravel). An adaptive learner and collaborative team player and eager to embrace new challenges

WORK EXPERIENCE

Student Intern – Medan State Administrative Court (PTUN Medan)	August 2025
- Supported operational system activities within a judicial institution, adhering to strict data accuracy and confidentiality standards. - Designed and executed functional feasibility testing for "Si Butet" (Electronic Visitor Guest Book System), ensuring the platform seamlessly handled various edge-case user inputs. - Authored structured technical reports detailing system evaluation, implementation, and optimization during the internship.	

ACADEMIC PROJECTS & RESEARCH

Deepfake Video Detection System	2026
- Designed and evaluated a Machine Learning model tasked with identifying AI-generated visual manipulations (deepfakes). - Tested the boundaries of AI capabilities by implementing Local Binary Pattern (LBP) feature extraction and Support Vector Machine (SVM) classification algorithms to achieve high analytical accuracy. - Collected, cleaned, and organized large datasets of video files to ensure high data quality for Machine Learning model training.	
Electronic Visitor Guest Book System	2025
- Managed functional and integration testing for a real-time information system and database designed to log and manage visitor interactions with high precision. - Performed functional testing and data validation for the Electronic Visitor Guest Book System, ensuring error-free data collection from user inputs.	
Tourism Recommendation Application	2024
- Developed an interactive mobile application focused on delivering accurate information and tailored destination recommendations to users. - Evaluated User Interface (UI) and User Experience (UX) flows to ensure that system-generated information was presented clearly, logically, and intuitively.	

EDUCATION

University Of Methodist Indonesia – Medan, Sumatera Utara	Sep 2022 – April 2026
Bachelor of Computer Science (Sarjana Teknik Informatika)	

- GPA: 3.70 / 4.00 (Cum Laude)

Bangkit Academy by Google, GoTo, Traveloka – Android Developer Cohort Sep 2024 – Des 2024

- Completed an intensive, industry-led training program centered on mobile application development.
- Implemented best practices in application architecture and navigation, focusing on Quality Assurance (QA) to deliver a seamless, error-free user experience.
- Developed strong skills in troubleshooting system logic and objectively evaluating data consistency.

CERTIFICATION

- **Data Analyst** – National Board for Professional Certification (BNSP) *(Demonstrates the capability to objectively evaluate, structure, and analyze complex datasets and responses).*

SKILLS

- **Programming Languages & Frameworks:** Kotlin, Python, PHP (Native & Laravel), Java, React Native (Expo), Tailwind CSS, HTML/CSS, MySQL.
- **Application & Web Development:** Android Development (Kotlin), Web Development.
- **Software:** Ms. Office(Excel, Word, PowerPoint), Video and Image Editing, Google Sheet
- **Other Skills:** Adaptability to new environments, Teamwork, Problem Solving, Attention to detail.
